Choosing UK or US

- Cultural identity – a cultural affinity with one option or the other but a British student can do the American option and vice versa!!
- Independent reading – there's more reading to do at home with the American option but that doesn't mean that there's less work to do at home in the British option!
- Pace – The British option spends more time on each text. Some students like this whereas others may find it frustrating to spend so much time on one book!! Some like the faster turnaround of texts in The American option whereas others find that it's too fast!

OIB History and Geography

Background Information

The OIB programme for 1^{ère} and Terminale is established by the French Ministry of Education and is divided between the French and the Anglophone section H/G teachers.

Both UK and US options follow the French HG programme - mid 19th century up to the 21st century in history and topics in geography.

The Programme

- There are no differences in Premiere
- In Terminale, half the course is on US history in the American Option and half on British history in the UK Option.
